sanas South African National Accreditation System

NON-CONFORMANCE, CORRECTIVE ACTION AND CLEARANCE REPORT

SANAS No.: **T1195**

Organisation Name: **Azuresky Laboratory**

NC Report Number: **AB05**

Area/Scope Assessed: **Management Requirements**

Assessor / Inspector / Expert: **A. Bougart**

PART 1: DETAILED OBSERVATION

At the time of the assessment it was observed that Document ASDP001 states services offered by CAB which are PT scheme provision and CRM production, but the range of lab activities does not include the testing of coal samples for clients.

Signed (Representative):

Signed (Team Leader / Inspector): A. Bougart

MAJOR: [X] MINOR: [ ]

Reference No. of relevant Guide / Standard / Requirement: **ISO/IEC 17025 requirement 5.3**

Date: **08/04/2026**

PART 2: ROOT CAUSE ANALYSIS

(Provide an analysis of the extent and cause of the nonconformity)

The laboratory expanded its services to include coal testing for clients, but the quality manual (ASDP001) was not simultaneously updated to reflect this change in the laboratory's operational scope, thereby resulting in incomplete system documentation

PART 3: CORRECTIVE ACTION TAKEN

(Clearly indicate what corrective action was taken, and attach supportig evidence of implementation)

Document ASDP001 has been revised to include testing activities for clients within the defined scope of laboratory activities.

Date: 16/04/2026

Signed (Representative): Mpanga

PART 4: CORRECTIVE ACTION VERIFIED AND CLEARED

(Comment on whether the corrective action is sufficient and appropriate)

Date:

Signed: Assessor / Inspector/Expert:

PART 5: FOLLOW-UP AT NEXT ASSESSMENT

(Comment on the implementation of the corrective actions)

Date:

Signed: Assessor / Inspector/Expert:

What went wrong?

> It was observed that document ASDP001 states services offered by CAB which are PT & CRM production but the range of activities does not include the testing of coal samples for clients.

Why 1: Why did ASDP001 not include the testing of coal samples for clients.

> The laboratory expanded its services to include coal testing for clients, but the quality manual (ASDP001) was not simultaneously updated to reflect this change in the laboratory's operational scope.

Why 2: Why was ASDP(001) not updated to reflect the expansion of scope.

> Incomplete system documentation.

Supervisor: Maponya

Azuresky (Pty) Ltd is entering into a coal laboratory testing market by offering more option/ marketplace of proficiency testing scheme and producer of certified reference materials. The company is looking to improve the service offering and stay on top of the competition to ensure customer satisfaction.

The service offering are as follows:

- Proficiency Testing Scheme that is designed and operated in multiple rounds for a coal testing, measurement, calibration or inspection.
- Certified Reference Material production that is prepared and tested to meet homogeneity and stability requirements.

The purpose of management system development

It is to identify, design and plan the activities which directly affect the validity of the proficiency testing scheme and certified reference material and ensure that they are carried out consistent with requirements of ISO 17043:2023; ISO 17034:2016 and ISO 17025:2017.

It is imperative that significant changes to the initial/ existing design plan which can affect validity of the proficiency testing scheme and certified material production are identified, ensure to identify the risks associated with the change, analyse, mitigate the causes to eliminate or reduce- impact thereof. Such activities may include:

- Proficiency testing item production
- Assessment of homogeneity and stability testing
- Determination of the assigned value
- Statistical analysis, etc

1. General requirements

1.1 Impartiality

ISO 17043:2023 clause 4.1, ISO 17034:2016 clause 4.2 and ISO 17025:2017 clause 4.1 require that the activities in the organisation are undertaken impartially.
The organisation has structured to manage impartiality in developing three documents:

- Risk assessment to impartiality
- Impartiality policy
- Declaration of interest

AFTER

	Azuresky	
	Management system requirements	Document no: ASDP001
	Compiled by: Sifiso Nyambi - Laboratory Manager	
	Approved by: Nonhlanhla Msibi - Operations Manager	

Azuresky (Pty) Ltd is entering the coal laboratory testing market with the aim of expanding the range of available services and providing a competitive, high-quality alternative within the industry. The company is committed to delivering reliable, accurate, and technically sound results, while continuously improving its service offering to meet customer needs and maintain a strong position in the market.

Service Offering

Azuresky (Pty) Ltd provides the following services:

- Proficiency Testing (PT) Schemes
  Design and operation of proficiency testing schemes conducted in multiple rounds for coal testing, measurement, calibration, and inspection activities, in accordance with applicable standards.
- Certified Reference Material (CRM) Production
  Production of certified reference materials that are prepared, tested, and verified to meet required homogeneity and stability criteria, ensuring fitness for purpose.
- Coal Testing Services
  Laboratory testing of coal samples using recognised methods, including:
  - Ash
  - Inherent Moisture
  - Volatile Matter
  - Calorific Value
  - Total Moisture
  - Particle Size Distribution (PSD)
  - Float and Sink Analysis

The purpose of management system development

The purpose of the management system is to identify, design, and plan all activities that directly affect the validity of **testing, proficiency testing (PT) schemes, and certified reference material (CRM) production**, and to ensure that these activities are carried out in a consistent and controlled manner in accordance with **ISO/IEC 17025:2017**, **ISO 17043:2023**, and **ISO 17034:2016**.

The laboratory shall ensure that all relevant processes are defined, documented, implemented, and maintained to support the accuracy, reliability, and traceability of results. All activities shall be performed using approved methods, competent personnel, and suitably calibrated and verified equipment.

Any significant changes to the initial or existing design, methods, equipment, materials, or processes that may impact the validity of testing, PT schemes, or CRM production shall be
