sanas South African National Accreditation System

NON-CONFORMANCE, CORRECTIVE ACTION AND CLEARANCE REPORT

SANAS No.: **T1195**

Organisation Name: **Azuresky Laboratory**

NC Report Number: **AB09**

Area/Scope Assessed: **Management Requirements**

Assessor / Inspector / Expert: **A. Bougart**

PART 1: DETAILED OBSERVATION

At the time of the assessment, it was observed that According to ASDP001 point 4.1 states that when a document has been amended a revision table needs to be completed and the content of the change identified, but at the time of the assessment document ASMF 7.17 was amended and no changes documented from version 0 to version 1.

Signed (Representative):

Signed (Team Leader / Inspector): A. Bougart

MAJOR: [X] MINOR: [ ]

Reference No. of relevant Guide / Standard / Requirement: **ISO/IEC 17025 requirement 8.3.2c**

Date: **08/04/2026**

PART 2: ROOT CAUSE ANALYSIS

(Provide an analysis of the extent and cause of the nonconformity)

Inadequate verification step

Procedural mis interpretation

PART 3: CORRECTIVE ACTION TAKEN

(Clearly indicate what corrective action was taken, and attach supportig evidence of implementation)

Immediate Correction

Staff training

ASMF 7.17 review

Date: 17/04/2026

Signed (Representative):

PART 4: CORRECTIVE ACTION VERIFIED AND CLEARED

(Comment on whether the corrective action is sufficient and appropriate)

Date:

Signed: Assessor / Inspector/Expert:

PART 5: FOLLOW-UP AT NEXT ASSESSMENT

(Comment on the implementation of the corrective actions)

Date:

Signed: Assessor / Inspector/Expert:

Problem Statement: According to ASDP001 4.1 : when a document has been amended a revision table needs to be completed & the content of the change identified, but at the time of the assessment document ASMF 7.17 was amended & no changes documented from version 0 to version 1.

Why one: why was a revision table not created to document changes made to ASMF 7.17?
The focus was placed on updating the content of the document, and completing the revision table was mistakenly treated as optional rather than a required step.

Why two: why was the revision table treated as optional?
Although a procedure exists, clearly stating the requirement of a revision table when changes are made to a document, this requirement was overlooked during the revision of ASMF 7.17. Additionally no review process was in place to ensure that the revision table so has been properly populated prior to document being finilized.

Supervisor:

Additional Space for NC's

IRQ no: AB09

Root cause

-> Inadequate verification Step:
The current document control workflow in ASDP001 focused primarily on the approval of technical content but lacked a specific administrative 'check-gate' to verify that the revision history table was populated before the document was authorized & released.

-> Procedural Misinterpretation:
Document authors prioritized the updates within the body of the document & viewed the revision history table as an optional summary rather than a mandatory requirement for compliance with ISO 17025 Clause 8.3.2c.

Corrective Action Taken

-> Immediate Correction:
ASMF 7.17 version 1 has been updated to include a detailed revision history table. The 'Content changed' column now explicitly defines the amendments made from version 0 to version 1

-> Staff Training:
A formal awareness session was held for all personnel involved in document creation. The training emphasized the importance of the revision table for maintaining the integrity of the Management System and ensuring that all staff can easily identify changes between versions

-> ASMF 7.17 review:
A full review of the ASMF 7.17 document was performed, where gaps were found, the revision table was updated to ensure full traceability of historical changes.

Before

	7.17. MANAGEMENT OF NON-CONFORMING WORK	
AzurESky	Document no: ASMF7.17	
	Compiled by: **Sifiso Nyambi - Laboratory Manager**	
	Approved by: **Nonhlanhla Msibi - Operations Manager**	

Applies to: All stages of Proficiency Testing and reference material (RM or CRM) production including sampling, characterization, homogeneity, stability, certification, labelling, and distribution.

1. Purpose

To define the procedure for identifying, documenting, evaluating, correcting, and preventing recurrence of any non-conforming work (NCW) that could affect the quality, integrity, or validity of certified reference materials (CRMs) or candidate RMs.

2. Scope

This applies to:

- RM/CRM batches failing stability or homogeneity requirements
- Incorrect property value assignments or uncertainty estimations
- Equipment malfunction affecting measurement validity
- Labelling, packaging, or CoA errors
- Any deviation from production or testing procedures
- Incorrect traceability or documentation

3. Responsibilities

Role	Responsibility
Lab Manager	Authorize containment and initiate investigation
Lab Supervisor	Lead root cause analysis and maintain NCW register
Lab analyst/ operator	Report and document non-conforming work immediately

CONTROLLED DOC

AzurESky	7.17. MANAGEMENT OF NON-CONFORMING WORK		
	Document no: ASMF7.17		
	Compiled by:	Sifiso Nyambi - Laboratory Manager	
	Approved by:	Nonhlanhla Msibi - Operations Manager	

Role	Responsibility
Operations Manager	Approve final corrective actions and ensure traceability of decisions

4. Identification of non-conformity

Sources may include:

- Observation during routine work or supervision
- Internal audits
- Stability/homogeneity test failures
- Customer complaints
- Out-of-spec test results
- Incorrect CoA's or labelling errors

5. Initial Actions

- Immediately halt use of affected RM/CRM or process step.
- Label the product or isolate the equipment with "NON-CONFORMING" tags.
- Notify the Laboratory/Operations Manager.
- Begin an NCW Report Form (paper).

CONTROLLED DOC

Effective date	Rev status	Next review date
07/2025	00	07/2028

6. Documentation

Each NCW must be documented using a controlled form/log that includes:

- Unique NCW ID
- Date/time of detection
- Process stage affected
- Description of non-conformance
- Responsible person(s)
- Immediate action taken (containment)
- Signature of person reporting

7. Evaluation and Risk Assessment

Assess whether the non-conformance:

- Affects previously released RMs/CRMs
- Requires rework, retesting, or full recall
- Risks invalidating assigned property values or traceability
- Has occurred before (recurring issue)

Use a **risk matrix** to evaluate severity and urgency.

CONTROLLED DOC

8. Corrective Actions

Once root cause is confirmed:

- Define the correction and corrective action
- Assign responsible personnel and target dates
- Validate effectiveness after implementation
- Document updates to SOPs, training, or process controls if needed

9. Follow-Up and Closure

- Verify the corrective action eliminated or mitigated the issue
- Retest or recharacterise RM/CRM batch if necessary
- Document closure with review sign-off from operations/lab manager
- Update NCW register and archive all records securely

10. Record Retention

- NCW records must be stored for **minimum of 10 years**, linked to batch records.
- Include them in management review for trend analysis.

GUIDELINE MEMO

Subject: Procedure for Updating Controlled Documents (Procedures, Memos, and Forms)
Document No: 8.3
Revision: 00
Effective Date: 16/04/2026
Next Review Date: 04/2029

1. Purpose

The purpose of this guideline is to define a standardized and controlled approach for updating management system documents, including procedures, critical memos, and forms, to ensure traceability, version control, and compliance with quality management system requirements.

2. Scope

This guideline applies to all controlled documents within the Conformity Assessment Body (CAB), including but not limited to:

- Procedures
- Work Instructions
- Critical Memos
- Forms and Templates (where revision tables are necessary)

3. Responsibilities

- **Management:** Authorisation of document changes and final approval

Revision	Initial Date	Next Rev Date
00	04/2026	04/2029

AzurESky	**Updating procedures and/or forms**		
	Document no: 8.3 Memo		
	Compiled by:	**Tshepo Maponya - Laboratory Supervisor**	
	Approved by:	**Nonhlanhla Msibi - Operations Manager**	

4. Procedure for Updating Documents

When any controlled document requires revision, the following steps shall be strictly followed:

Step 1: Archiving of Current Version

- The existing (approved) version of the document shall be **copied and stored in the designated "Obsolete Documents" folder**.
- The obsolete document shall be clearly identifiable to prevent unintended use.

Step 2: Update Document Control Information

- Amend the following fields in the document:
  - **Revision Number / Version**
  - **Revision Date (Current Update Date)**
  - **Next Review Date**

Step 3: Implement Required Changes

- Proceed to **update, amend, or modify** the document content as required.
- Ensure all changes are accurate, clear, and aligned with applicable standards and operational requirements.

Step 4: Update Revision History Table

- Navigate to the **Revision Table** and record the following details:
  - Revision Number
  - Description of Changes Made
  - Reason for Change
  - Date of Change

AzurESky	**Updating procedures and/or forms**		
	Document no: 8.3 Memo		
	Compiled by:	**Tshepo Maponya - Laboratory Supervisor**	
	Approved by:	**Nonhlanhla Msibi - Operations Manager**	

5. Control Measures

- No document shall be updated without proper authorisation.
- Only the latest approved version shall be available for use.
- All changes must be fully traceable through the revision history (which can be found in the rev table).

6. Compliance Reference

This guideline aligns with the requirements of:

- **ISO/IEC 17025:2017 – Clause 8.3 (Control of Management System Documents)**

7. Records

The following records shall be maintained:

- Obsolete document archive
- Updated controlled document
