sanas South African National Accreditation System

NON-CONFORMANCE, CORRECTIVE ACTION AND CLEARANCE REPORT

SANAS No.: **T1195**

Organisation Name: **Azuresky Laboratory**

NC Report Number: **AB13**

Area/Scope Assessed: **Management Requirements**

Assessor / Inspector / Expert: **A. Bougart**

PART 1: DETAILED OBSERVATION

At the time of the assessment, it was observed that the laboratory did not have an audit report nor evidence of results of the internal audit reported to relevant management as per ASMF8.7 page 7.

Signed (Representative):

Signed (Team Leader / Inspector): A. Bougart

MAJOR: [X] MINOR: [ ]

Reference No. of relevant Guide / Standard / Requirement: **ISO/IEC 17025 requirement 8.8.2c**

Date: **08/04/2026**

PART 2: ROOT CAUSE ANALYSIS

(Provide an analysis of the extent and cause of the nonconformity)

- Ineffective system documentation
- ~~Complex~~ Redundant procedural design
- Non adherence to procedure.

TMS

PART 3: CORRECTIVE ACTION TAKEN

(Clearly indicate what corrective action was taken, and attach supportig evidence of implementation)

- Optimization / Revision of procedure ASMF 8.7
- Formalization of Reporting evidence
- Quality Manual Update
- Session for communication of changes to procedure ASMF 8.7 & the quality manual.

Date: 21/04/2026

Signed (Representative): Apanga

PART 4: CORRECTIVE ACTION VERIFIED AND CLEARED

(Comment on whether the corrective action is sufficient and appropriate)

Date:

Signed: Assessor / Inspector/Expert:

PART 5: FOLLOW-UP AT NEXT ASSESSMENT

(Comment on the implementation of the corrective actions)

Date:

Signed: Assessor / Inspector/Expert:

What went wrong?

- It was observed that the laboratory did not have an audit report nor evidence of results of the internal audit reported to relevant management as per ASMF 8.7. page 7.

Why was there no audit report or evidence of results?

- The internal audit was conducted using individual SANAS assessment form (F48, F49, F176 etc), but these were not synthesized into a single final narrative "Audit Report" as defined in the previous version of the procedure.

Why were these forms not synthesized into a report?

- The existing procedure (ASMF 8.7) was interpreted by the internal auditor as requiring a seperate report document in addition to the detailed technical checklist, creating redundant work.

Why was the reporting to management considered insufficient?

- The results (NCs) were discussed, but because there was no "final Report" document to sign off on, there was no objective evidence of a formal handover of results to relevant management.

Why did the procedure emphasize a "report" document over "results"?

- The QMS was designed with a traditional reporting structure that did not account for the efficiency of using specialized SANAS technical forms as the primary audid record.

Why did this lead to a Non-conformance? The laboratory's Internal Audit procedure (ASMF 8.7) was too narrowly defined, requiring a specific document type (Audit report) rather than focusing on the effective communication of audit findings (results & NCs) through standardized technical checklist.

Root Cause Analysis - Part 2

Redundant/Complex Procedural Design: The laboratory procedure (ASMF 8.7) required a standalone narrative report to be generated following an audit. This created a significant administrative redundancy, as the audit findings were already fully documented and signed off on the relevant SANAS F-forms and Non-conformance logs.

Non-adherence to procedure: The results pack (signed F-forms and NCs) provided sufficient objective evidence of the of the audit results and their communication to management, auditors skipped the narrative report. This in a failure to adhere to the rigid administrative requirement of the current procedure.

Underutilization of Existing Evidence: The QMS did not formally define the signed 'Results Pack' as the official reporting mechanism. Therefore, while evidence of reporting existed via signature on technical forms, it was not recognised as a compliant 'Audit Report' under the previous procedural definition.

Part 3: Corrective Action Taken

* **Revision/Optimization of Doc ASMF 8.7:** The relevant procedure (ASMF 8.7) has been revised to eliminate the requirement for a separate narrative audit report. The procedure now formally defines the 'Internal Audit Results Pack' - consisting of completed SANAS F-forms and associated Non-Conformance reports as the official record of the audit.
* **Formalization of Reporting Evidence:** To ensure full compliance with ISO 17025 Clause 8.8.2 c, the revised procedure explicitly recognized the existing signature blocks on the SANAS F-forms and NC logs as objective evidence of reporting results to relevant management.
* The quality manual has been updated to reflect this streamlined reporting structure, ensuring that the 'results pack' is recognised as a comprehensive and compliant audit report.

Supervisor: (Mkhaponya)

* A session was held for the communication of changes to procedure ASMF 8.7 & the quality manual.

- The audit objectives,
- The audit scope,
- Identification of the auditee,
- Identification of audit team and Auditee's participants,
- The dates and locations where the audit activities were conducted
- The audit findings and,
- The audit conclusions.

conduct follow up audit and audit close out

- The Auditee shall within the specified time frame provide the Lead Auditor with evidence of the corrective action implemented.
- The Lead Auditor and the audit team members shall assess the suitability of the evidence of the corrective action submitted by the auditee.
- In the event that the provided corrective actions/evidence are suitable then, the non-conformances shall be closed.
- In the event that the implemented corrective actions provided are not suitable, appropriate action shall be taken to address the gap.
- Should the assessment indicate that the corrective actions are not effectively implemented, then the non-conformance(s) will remain open.
- The Lead Auditor shall conduct the close out sign off the non-conformance indicating the status of the corrective action (Closed/Rejected).
- The copies of non-conformances shall be retained or stored both hardcopy and softcopy.
- The Lead Auditor shall share the audit results at the management review meeting.

Audit records

- All records of the audit evidence shall be readily available both hardcopy and softcopy.

CONTROLLED DOC

Conduct laboratory audit

The audit team shall assess effectiveness of the Quality Management System and compliance to the revelent codes of practice, Laboratory developed methods and Legal Agreements. The audit team shall ensure the audit scope covers technical and/or management system audits.

The Lead Auditor shall on the day of the audit perform the following:

- Conduct the opening meeting
- Introduce the audit team
- Conduct the audit as planned
- Attain all signed off non-conformances (Hardcopy and/or Emailed copy).
- Conduct the closing meeting.
- Issue an audit report to all parties concerned.

Auditors shall on the day of the audit perform the following:

- Conduct the audit as planned
- Record all non-conformances on ASMF 8.7.3 improvement action request
- Classify the non-conformances either as major, minor or observation
- Discuss the outcome of the audit with the Auditee.

Compile report

The report for laboratory audit shall be compiled as follows:

- The Lead Auditor shall compile a draft report.
- The draft report shall be reviewed by any other management team member for correctness and truthfulness of the record.
- The report shall be authorized by any other senior management team member and distribution to all personnel within 12 working days.

The audit report shall provide an accurate and clear record of the audit process and shall include the following:

CONTROLLED DOC

AFTER

Conduct laboratory audit

The Lead Auditor shall on the day of the audit perform the following:

- Conduct the opening meeting
- Introduce the audit team
- Conduct the audit as planned
- Issue non-conformances when they arise. (Hardcopy and/or Emailed copy).
- Conduct the closing meeting and share the findings.

Auditors shall on the day of the audit perform the following:

- Conduct the audit as planned
- Record all non-conformances on the SANAS F03-09 document.
- Classify the non-conformances either as major, minor or observation
- Discuss the outcome of the audit with the Auditee.
- Some of the documents that can be used during the audit include but not limited to SANAS F44, F48. F49, F90, F91, F66, F176

- The results of the internal audit shall be documented in a comprehensive Internal Audit Results Pack. This pack serves as the official record of the audit and final report to management. The Results Pack consists of:
  - **SANAS Assessment Forms**: Relevant SANAS technical checklist (Including but not limited to F44, F48, F49, F91, F66, and F176) as selected by the auditor based on the scope of the audit, Or any document the auditor deems fit for the scope they are auditing.
  - **Non-Conformances records (NC)**: Any non-conformances raised to be documented on the SANAS F03-09

In accordance with ISO 17025 Clause 8.8.2 c, the reporting of results to relevant management is evidenced by the mandatory signatures of the laboratory representative/management on both the F-forms and the NC records. The completion and signing of this "Results Pack" concludes the audit cycle and satisfies the requirements for a formal audit report, eliminating the need for a narrative summary.

- NB: Major NC shall be addressed within 7 days; Minor NC shall be addressed within 14 days

Revisions

Date	Rev.	Content Changed	Reason for change
17/04/2026	01	• The steps in the laboratory audit procedure, step 4 omitted & step 6 amended. • Introductory paragraph omitted, under "Conduct laboratory audit." • "Attain all signed off non-conformances" amended to "Issue non-conformances when they arise." • "Record all non-conformances on ASMF 8.7.3 improvement action request." Amended to "record all non-conformances on the SANAS F03-09 document." • Some of the documents that can be used during the audit include but not limited to SANAS F44, F48. F49, F90, F91, F66, F176 added under "conduct laboratory audit" • Compile Report section omitted. • Audit records amended to say that all audit evidence shall be made available "either" in soft "or" hard copies. • "It is acceptable to store the non-conformances on soft copies or hard copies as long as either the soft copies or the hard copies are easily retrievable during the audits or MRMs", added under Conduct a follow up and close out	Simplification of the management system.
20/04/2026	02	Consolidated audit reporting into a "Results Pack" utilizing signed SANAS F forms and F03-09 NC form to ensure objective evidence of management reporting and remove administrative redundancy.	Simplification of the management system.
