	AS028TF	**Checklist for Packaging**	
	Compiled by:	**Sifiso Nyambi- Laboratory Manager**	
	Approved by:	**Nonhlanhla Msibi- Operations Manager**	

No.	Verification Item	Requirement / Acceptance Criteria	Yes / No	Remarks
1	Analytical validation approval	All analytical parameters for the CRM batch have been validated and formally approved prior to packaging.		
2	CRM label availability	Permanent CRM identification stickers are available prior to commencement of packaging.		
3	Individual bottle labelling	Each CRM bottle is individually labelled with the correct CRM code, batch number, and required identification details.		
4	Label legibility and attachment	Labels are legible, securely affixed, and resistant to normal handling and storage conditions.		
5	Batch traceability verification	Bottle labels correspond correctly to the approved batch records and CRM documentation.		
6	Tamper-evident sealing	All CRM bottles are sealed using approved tamper-evident containers or seals.		
7	Temporary labelling (if applicable)	Where permanent labels were unavailable, approved temporary identification was applied, documented, and bottles were quarantined.		
8	Permanent label reconciliation	Permanent CRM labels were applied and verified prior to release from quarantine (if temporary labels were used).		
9	Release authorization	Packaging and labelling have been reviewed and authorized by designated personnel prior to storage or use.		
10	Storage authorization	Only fully labelled and verified CRM bottles are released to the designated CRM storage facility.
