	DECLARATION OF PERSONNEL COMPETENCE		
AzurESky "ensure quality of test"	Document no: ASMF 6.2 PROCEDURE		
	Compiled by:	**Tshepo Maponya – Laboratory Supervisor**	
	Approved by:	**Nonhlanhla Msibi - Operations Manager**	

1. Purpose

To define the process for evaluating, declaring, and maintaining the competence of personnel performing laboratory activities in compliance with **ISO/IEC 17025:2017 Clause 6.2**.

2. Scope

This procedure applies to all laboratory personnel involved in testing, calibration, sampling, reporting of results, and supporting technical functions.

3. References

- ISO/IEC 17025:2017, Clauses 6.2.1 – 6.2.6
- Laboratory Quality Manual(ASDP001)
- Competence Declaration of Competence form (ASMF6.1 Form)

4. Definitions

- **Competence:** Demonstrated ability to apply knowledge and skills to perform assigned tasks.
- **Authorization:** Formal approval by the Laboratory Manager or Supervisor permitting personnel to carry out specific laboratory tasks unsupervised.
- **Technical Assessment:** A structured theoretical evaluation that verifies understanding of method principles, calculations, and quality requirements.

Controlled Doc

5. Responsibilities

Roles	Responsibilities
Laboratory Manager / Supervisor	• Ensures training, assessments, and witnessing are conducted; approves final competence declarations. • Maintains competence records and monitors retraining needs.
Operator / Analyst	• Participates in training and assessment; ensures competence is maintained through ongoing performance.

6. Procedure

6.1 Determination of Competence Requirements

- For each test method or activity, minimum competence requirements shall be defined, including:
    - Education level or technical background
    - Method-specific training
    - Practical laboratory experience
    - Understanding of quality system procedures (QMS, ISO 17025, ISO 17034 & ISO 17043 requirements)

Onboarding Lab Supervisors/Managers with prior technical signatory appointment in a similar accredited laboratory do not need test method training/witnessing; only the theoretical assessments and running of a PT sample for competency evaluation should

Controlled Doc

suffice. For further understanding of technical signatory selection, appointment and authorization, refer to AS016 Proc.

The Director of the organization has full responsibility for appointing a nominated representative (NR), appointing and authorizing all technical signatories(TS).

6.2 Training Process

- Onboarding personnel shall undergo **initial method training** conducted by a competent analyst or supervisor.
- The training includes:
    1. **Review of the method procedure (SOP).**
    2. **Explanation of the purpose, principle, and critical control points.**
    3. **Demonstration of the method by a qualified analyst/operator.**
    4. **Supervised performance of the method by the trainee.**

6.3 Technical (Theoretical) Assessment

- Following training, the trainee shall complete a **written technical assessment** to evaluate:
    - Understanding of the analytical principles
    - Calculations and data interpretation
    - Equipment operation and safety
    - Awareness of method limitations and potential sources of error

Results are recorded and evaluated by the Laboratory Manager.

6.4 Practical Witnessing

- The trainee performs the full method **independently under observation** by a qualified witness (Supervisor or Manager).

Controlled Doc

- The witness completes a **Witnessing form (SANAS F15-11)** confirming satisfactory performance of:
    - Sample handling and preparation
    - Instrument use and calibration
    - Data recording and reporting
    - Compliance with the SOP and safety rules
    - Walkthrough on the method critical points

6.5 Authorization and Declaration

- Upon successful completion of:
    - Method training
    - Technical (theoretical) assessment
    - Practical witnessing

The **Laboratory Manager/Supervisor** authorizes the individual to perform the specific test method **without supervision**.

Authorization is documented on the **Competence Declaration Form (ASMF 6.1 FORM)**, signed by both the Manager/Supervisor and the authorized staff member.

6.6 Ongoing Competence Monitoring

- Competence shall be re-evaluated:
    - Annually, or
    - After major method revisions, extended absence, or poor PT performance.
    - Ongoing competence monitoring shall be conducted via witnessing with the usage of SANAS F15-11 form.

Controlled Doc

- Refresher training or reauthorization shall be conducted if needed.

---

7. Records

Record Name	Form No.	Retention Period
Competence Declaration Form	ASMF 6.1 FORM	10 years
SANAS	F 15-11	10 years

8. Related Documents

- Quality Manual(ASDP001)
- SANAS (F15-11)
- SOPs for individual test methods (e.g. AS001IW,AS003IW,AS007IW etc.)
