	Statement of Conformity		
	Document no: ASMF5.3		
	Compiled by:	**Tshepo Maponya – Laboratory Supervisor**	
	Approved by:	**Nonhlanhla Msibi - Operations Manager**	

1. Purpose

This document defines the range of laboratory activities for which **Azuresky (Pty) Ltd** claims conformity with the requirements of **ISO/IEC 17025:2017**, **ISO/IEC 17034:2016 and ISO/IEC 17043:2023** as well as the control and identification of externally provided laboratory activities that fall outside the scope of conformity.

---

2. Scope of Laboratory Activities

Azuresky (Pty) Ltd is engaged in the analysis of solid fuels and related materials. The laboratory operates from its rented facility located at unit 3, 17 Makriel Road, Wadeville, GERMISTON 1428.
All testing activities listed below are performed under the management system compliant with ISO/IEC 17025:2017 and are subject to internal quality control, method validation, and competence assurance processes. The assessment and monitoring of homogeneity, the assessment and monitoring of stability and characterisation, assignment of property values and their uncertainties, packaging and distribution service are performed under the management system of ISO/IEC 17034:2016 and ISO 17043:2023.

2.1 In-House Laboratory Activities Claimed Under Conformity

Activity	Test Method / Standard	Description
Sample Preparation	ISO 13909-4	Preparation, homogenization, and reduction of samples for analytical testing.
Ash Content	ISO 1171	Determination of ash content in coal and coke.
Volatile Matter	ISO 562	Determination of volatile matter content in coal and coke.

Gross Calorific Value	ISO 1928	Determination of gross calorific value and calculation of net calorific value.
MIAS	SANS 5925	Determination of moisture in analysis sample coal and related solid fuels.

Note: While Azuresky (Pty) Ltd conducts its own sampling in accordance with ISO 18283 (Coal Sampling Procedures) when the need arises, sampling is not included within the laboratory's claimed scope of conformity or accreditation.

---

3. Externally Provided Laboratory Activities

The following analyses are **outsourced** to approved and competent laboratories. These tests are **excluded from Azuresky (Pty) Ltd's ISO/IEC 17025 conformity claim**, but are controlled through supplier evaluation, contractual agreements, and result traceability.

Externally Outsourced Test	Method / Standard	Provider Status
Total Sulphur	ASTM D4239	Performed by ISO 17025-accredited partner laboratory.
Ash Fusion Temperature (AFT)	ISO 540	Performed by ISO 17025-accredited partner laboratory.

All external laboratories are evaluated based on competence, accreditation validity, proficiency performance, and result reliability before engagement.
Results obtained from these laboratories are **clearly identified in test reports** as externally performed and are not represented as part of Azuresky (Pty) Ltd's conformity claim.

---

4. Distribution Service

Azuresky (Pty) Ltd conducts its own packaging however the distribution samples, Azuresky and courier service handle the service. The laboratory using controlled procedures to ensure sample integrity, traceability, and security. Transportation activities are **internal support functions** and form part of the laboratory's quality system but are **not analytical activities** under the conformity scope.

---

5. Statement of Conformity

Clause 5.3 – Conformity Claim Statement

Azuresky (Pty) Ltd claims conformity with ISO/IEC 17025:2017 for all coal and solid fuel analytical activities performed within its rented facility, including sample preparation, ash, volatile matter, calorific value, and MIAS determinations.

Externally provided laboratory activities such as Total Sulphur (ASTM D4239) and Ash Fusion Temperature (ISO 540) are **excluded** from this conformity claim.

These outsourced analyses are conducted by evaluated and approved ISO 17025-accredited laboratories. Results from such tests are clearly identified in all reports and do not form part of Azuresky (Pty) Ltd's scope of conformity.

Sampling (ISO 18283) and transportation of samples are performed as support functions but are not included within the laboratory's accreditation scope.

Azuresky (Pty) Ltd claims conformity with ISO/IEC 17043:2023 for the design, running and controlling the proficiency testing scheme activities involving coal and solid fuel performed within its rented facility.

Azuresky (Pty) Ltd claims conformity with ISO/IEC 17034:2016 for the technical and production of reference material activities involving coal and solid fuel performed within its rented facility.

6. Responsibility and Review

The **Laboratory Manager** is responsible for ensuring:

- The accuracy and currency of this conformity statement.
- That any changes in internal or outsourced activities are reflected in the document.
- That staff are aware of which activities fall within or outside the accredited scope.

This document shall be **reviewed annually** or whenever any change occurs in the laboratory's operational scope or the status of its external providers.
