AzureSky Pty Ltd
Proficiency Testing Scheme – Participant Instructions
AzureSky PT Scheme- Round 1
Date: 13 October 2025

Sample 10/2025 HGI

Dear Participants, below are the instructions to participate in the AzureSky (Pty) Ltd Proficiency Testing scheme.

1. Objective of the Study

The purpose of this proficiency testing (PT) round is to evaluate the performance and analytical capability of participating laboratories in determining the analysis as outlined in the ***link*** provided via email.

2. Confidentiality and Independence

Participants are strictly prohibited from exchanging results or comparing data with other laboratories during the study. This measure ensures the integrity and independence of the performance evaluation. Collusion or collaborative data sharing undermines the objectives of ISO 33405.

3. Replicate Determinations

Participants are required to perform 2 replicate determination(s) per unit, using their routine analytical methods.

4. Method Instructions

- The Sample has been crushed to -4.75mm.

-Dry the sample and conduct HGI as per your SOP.

5. Measurement Quality and Traceability

- Measurements must be traceable to recognized national/international standards.

- Apply internal quality assurance (QA) and quality control (QC) procedures.

- Ensure accuracy and identify bias through appropriate measures.

Effective date	Rev status	Revision date
09/2025	01	09/2028

6. Time Schedule

Distribution of samples : No later than 10th of every month

Submission of results : No later than 25th of every month

Feedback report to participants : No later than 06th of every month

7. Mode of Dispatch

Samples will be dispatched via courier or hand delivered by Azuresky Pty Ltd, securely packaged and labelled.

8. Sample Storage Requirements

Upon receipt, store samples as following:

- Temperature: Room temperature should not be greater than 23°C.

- Conditions: Keep sealed, dry, and away from heat or contamination.

9. Sample Treatment Instructions

Where applicable, follow specific instructions for sample pre-treatment. If none are provided, proceed with routine preparation methods.

10. Internal Quality Control Measures

Participants should implement QC measures such as:

- Use of internal reference materials

- Control charts

- Duplicate analysis

- Spike recovery (where relevant)

NB: Any anomalies or suspected bias should be documented and submitted with your results.

11. Laboratory Identification and Data Use Policy

- Each lab will be assigned a unique confidential code.

- Results will be anonymized in reporting unless explicit permission is granted.

- Data may be used for further characterization or interlaboratory comparison.

12. Standards

- HGI (ISO 5074)

13. Contact Information

Proficiency Testing Coordinator: Nonhlanhla Msibi

Email: nonhlanhla@azuresky.it.com, info@azuresky.it.com

Phone: 082 786 8149

Website: https://azuresky.it.com/

14. Participant Confirmation

Kindly confirm receipt of the PT materials and intent to participate within 1 week of receiving the PT sample(s) using the provided emails.

Thank you for your participation and your continued commitment to quality improvement.

Nonhlanhla Msibi: Managing Director/ Proficiency Testing Coordinator
