Compiled by:	Sifiso Nyambi- Laboratory Manager	
Approved by:	Nonhlanhla Msibi- Operations Manager	

VOLATILE MATTER ANALYSIS SHEET

DATE:	ANALYST'S NAME

Sample ID	Crucible mass	Mass of crucible + sample	Mass of crucible + burnt coal	% Volatile	Furnace no.	Average	Balance no.	Checked by (Supervisor's name)

CALCULATIONS

% VOLATILES = $\frac{Mass\ of\ sample\ after\ heating}{Mass\ of\ sample\ before\ heating} X100$

Note: The volatile matter has to be corrected for inherent moisture before calculations can be carried out.
Mass of sample after heating= (Mass of sample+crucible) – Mass of empty crucible
