QUALITY POLICY STATEMENT

Top management commits to document operating procedures for the preparation, testing (homogeneity, stability and postproduction checks for stability) as per the aspects of ISO 17025:2017 for the competence of testing and calibration laboratories.

Top management commits to carry out all Proficiency Testing activities as per the requirements stated in ISO 17043:2023 and provide the participant with an information and support to demonstrate and improve the quality of their analytical measurement.

Top management commits to adherence to all aspects of reference material production as per requirements of ISO 17034:2016 including, characterize, storage, shipping postproduction checks for stability.

Top management commits to confidentiality and impartiality. All customers information and results are protected to ensure confidentiality. Top management enforces all personnel to always act impartially, practice good professionalism to ensure that the integrity of the system and results are maintained.

Document and ensure traceability of data through LIMS to enable assessment of the evaluation of testing data, homogeneity and stability of proficiency testing samples and reference materials.

Identify the uncertainties in the production line, improve the measurement process through performing verification, efficiencies, calibrations and competence monitoring of personnel to reduce the uncertainty of measurement then account in the characterization of certified reference material.

Ensure the review of the management system through auditing the system periodically to provide confidence in effectiveness of the system.

Identify risks of the production line, assess and document opportunities or mitigation. Ensure actions are taken proportionate to the impact of product quality.

Document post-production monitoring of reference material and keep the record.

Know the cost of sales and optimise the production line.
