	Statement of Conformity (defining the scope of lab activities)		
	Document no: ASMF5.3		
	Compiled by:	**Sifiso Nyambi – Laboratory Manager**	
	Approved by:	**Nonhlanhla Msibi - Operations Manager**	

1. Purpose

This procedure defines and documents the range of laboratory activities performed by Azuresky (Pty) Ltd and identifies which activities are conducted in-house and which are externally provided. This document ensures transparency of laboratory operations and prevents misrepresentation of accreditation status.

2. Status of the Laboratory

Azuresky (Pty) Ltd is currently implementing a management system aligned with the requirements of ISO/IEC 17025:2017, ISO/IEC 17034:2016 and ISO/IEC 17043:2023.
The laboratory is not accredited by SANAS or any other accreditation body at this stage.
No claim of accreditation or accredited scope is made in this document or in any laboratory reports, marketing material, or official communications.

3. Location of Activities

All in-house laboratory activities are conducted at:
Unit 3, 17 Makriel Road, Wadeville, Germiston, 1428.

4. In-House Laboratory Activities

The following analytical activities are performed internally under the laboratory's management system and controlled procedures:

Activity	**Test Method / Standard**	**Description**
Sample Preparation	ISO 13909-4	Preparation, homogenisation and reduction of solid fuel samples for analysis
Ash Content	ISO 1171	Determination of ash in coal and coke
Volatile Matter	ISO 562	Determination of volatile matter in coal and coke

Activity	Test Method / Standard	Description
Gross Calorific Value	ISO 1928	Determination of gross calorific value and calculation of net calorific value
MIAS	SANS 5925	Determination of moisture in analysis sample of coal and related solid fuels
PSD	ISO 1953	Determination of Particle Size Distribution of coal
Total Moisture	ISO 589	Determination of Total Moisture of Coal

These activities are performed using validated methods, trained personnel and internal quality controls; however, **they are not accredited activities**.

5. Sampling Activities

Sampling is performed in accordance with ISO 18283 when required by customers. Sampling is treated as a support activity and is not included within the laboratory's claimed scope of conformity or any future accreditation scope unless formally applied for and approved.

6. Externally Provided Laboratory Activities

The following tests are outsourced to competent external laboratories:

Test	Method	Provider Status
Total Sulphur	ASTM D4239	ISO/IEC 17025 accredited laboratory
Ash Fusion Temperature (AFT)	ISO 540	ISO/IEC 17025 accredited laboratory

Externally provided activities are:

- evaluated and approved prior to use
- clearly identified in reports as externally performed
- excluded from Azuresky (Pty) Ltd.'s internal activity range

7. Distribution and Transport

Azuresky (Pty) Ltd performs internal packaging of samples.
Courier services are used for transportation.
These activities are controlled to ensure sample integrity, traceability and security but are not analytical activities.

8. Prohibition of Accreditation Claims

Azuresky (Pty) Ltd shall not:
- claim SANAS accreditation
- imply accreditation
- use SANAS symbols
- refer to any “scope of accreditation”

until formal accreditation has been granted.

9. Responsibility and Review

The Laboratory Manager is responsible for:
- maintaining this document
- ensuring only defined activities are performed
- ensuring no false accreditation claims are made
- updating this document when activities change

This document shall be reviewed annually or when operational changes occur.

Date	Rev no	Contents Changed	Reason for revision
02/2026	01	The claiming of conformity to recognized ISO standards	Compliance with ISO 17025
