F 03-09

NON-CONFORMANCE, CORRECTIVE ACTION AND CLEARANCE REPORT

SANAS No.: T1195

Organisation Name: **Azuresky Laboratory**

NC Report Number: **AB03**

Area/Scope Assessed: **Management Requirements**

Assessor / Inspector / Expert: **A. Bougart**

PART 1: DETAILED OBSERVATION

Although a risk assessment to impartiality was done on 19/08/2025,at the time of the assessment it was observed that the risks were not evaluated and graded based on a risk scale where the likelihood and consequences give a scale for each risk

Signed (Representative):

Signed (Team Leader / Inspector): A. Bougart

MAJOR: [X] MINOR: [ ]

Reference No. of relevant Guide / Standard / Requirement: **ISO/IEC 17025 requirement 4.1.5**

Date: **08/04/2026**

PART 2: ROOT CAUSE ANALYSIS

(Provide an analysis of the extent and cause of the nonconformity)

⇒ System implementation oversight.
⇒ Lack of final verification.

PART 3: CORRECTIVE ACTION TAKEN

(Clearly indicate what corrective action was taken, and attach supportig evidence of implementation)

⇒ Evaluate & grade each of the risks
⇒ Staff briefing to emphasize the importance of following the entire risk assessment workflow as documented in the SOP.

Date: 21/04/2026

Signed (Representative):

PART 4: CORRECTIVE ACTION VERIFIED AND CLEARED

(Comment on whether the corrective action is sufficient and appropriate)

Date:

Signed: Assessor / Inspector/Expert:

PART 5: FOLLOW-UP AT NEXT ASSESSMENT

(Comment on the implementation of the corrective actions)

Date:

Signed: Assessor / Inspector/Expert:

What went wrong? Risks to impartiality were not evaluated & graded based on a risk scale where the likelihood and consequences give a scale for each risk.

Why1: Why were the risks not evaluated & graded: Although the risk assessment was done, personnel failed to double check the completeness of the "registers" against the requirements of the quality manual.

Why2: Why were the QM requirements not fulfilled: Oversight on implementation of the system.

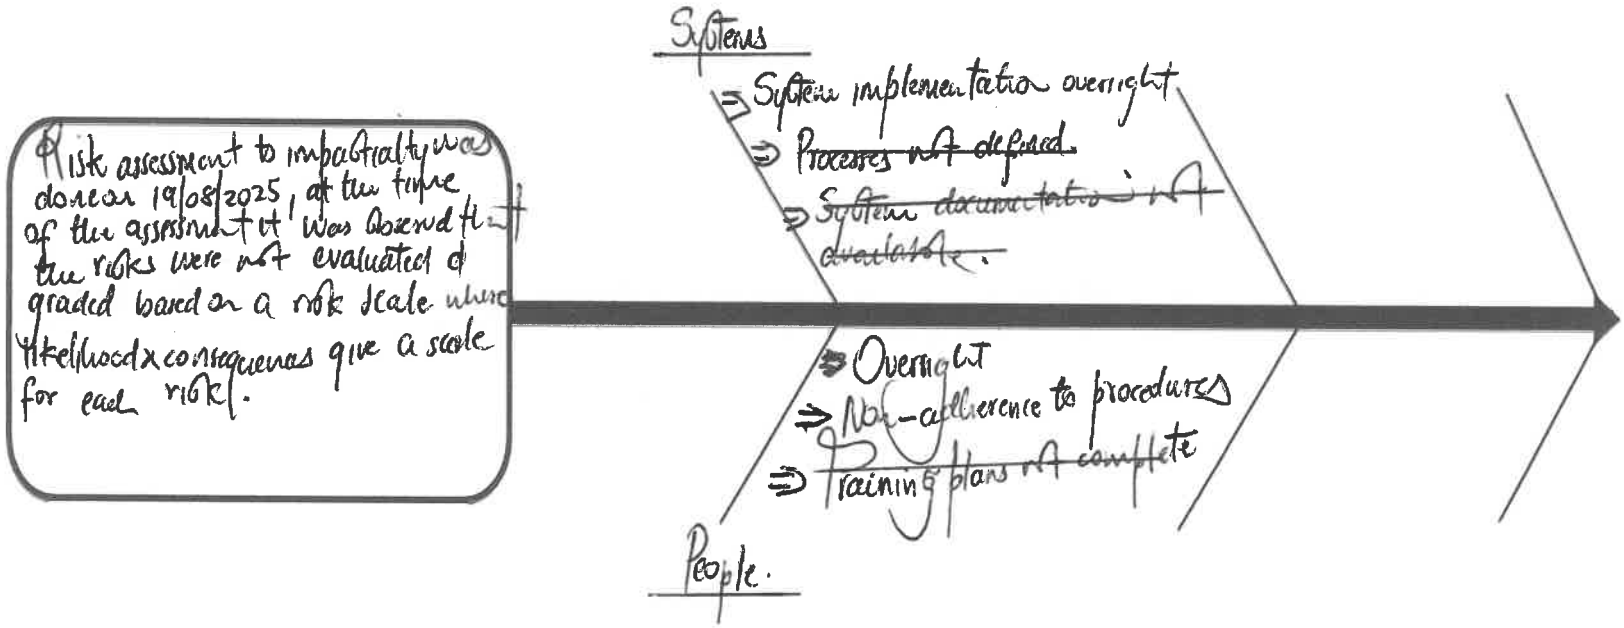

Supervisor:

AS001MF

IRQ no: AB03

Extent of NC: A review of the impartiality risk (19/08/2025) confirmed that while the identification of risks was thorough, the subsequent evaluation (grading) step was omitted. This was found to be an isolated oversight specifically related to that session's documentation.

Root cause:

(1) System Implementation oversight: Although the quality manual (QMS) define the requirement for risk evaluation using risk x consequence formula, the personnel involved failed to apply this specific step during the finalisation of the 19/08/2025 register.

(2) Lack of final verification: The process lacked a final "Quality control" check to ensure that the risk register was 100% complete. The focus was heavily placed on the identification of risks, leading to the administrative omission of the grading values.

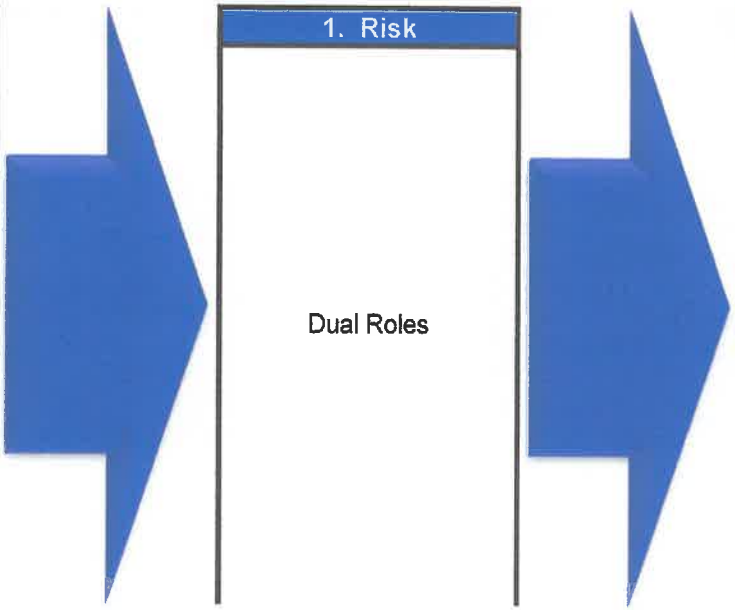

Corrective action:

1. The management reconvened to perform the evaluation of the previously identified risks. Risks have now been graded according to likelihood x consequence scales
2. The completed graded register has been doubled checked (reviewed) by the lab supervisor to ensure completeness.
3. Staff briefing: A briefing was held with management team to reinforce the importance of following the entire risk assessment workflow as documented in the Quality Manual

Supervisor: [signature]

Risk Assessment

	2. Causes (of the risk)
1	If the same person is doing the test and approving the results.
2	Lack of personnel
3	Ineffective or inadequate training of personnel
4	
5	
6	
7	
8	
9	
10	

1. Risk
Dual Roles

	3. Consequences (of the risk)	
1	There's a risk of bias, thus influencing the outcome.	
2	Undue pressure, juggling multiple roles at the same time which could affect the overall performance of individual involved.	
3		
4		
5		
6		
7		
8		
9		
10		

	4. Existing Controls for the Causes (affecting the likelihood of the risk)	Eff	Control Owner
	The results are checked are checked by the TS who did not compile the report.	P	Technical Signatories

	5. Likelihood	Matrix	Control Owner
	- > 50% probability, or - balance of probability will occur, or - could occur within "weeks to months"	D3	Operations Manager
	- 99% probability, or - impact is occurring now, or - could occur within "days to week"	E5	Operations Manager

Risk Assessment

2. Causes (of the risk)	
1	Senior staff or management might exert pressure on personnel to achieve a specific results/deadlines, maybe to please a client or maintain a contract.
2	
3	
4	
5	
6	
7

	4. Existing Control	Eff	Control Owner
	Managing director to setup a fund to combat such a risk when it emerges.		Managing director
	The alternative number is 082 786 8149 as displayed in the company website & in all client-facing documents e,g AS001 PT instruction form.	F	Managing director
	An alternative company number can be used for business relations with clients instead of personal numbers.	P	Managing Director
	Upper management to seek out more work	P	Managing Director

	5. Likelihood	Matrix	Control Owner
	- > 5% probability, or - may occur but not anticipated, or - could occur in "years to decades"	B3	
	- > 5% probability, or - may occur but not anticipated, or - could occur in "years to decades"	B4	
	- > 5% probability, or - may occur but not anticipated, or - could occur in "years to decades"	B3	
	- > 5% probability, or - may occur but not anticipated, or - could occur in "years to decades"	B4	

Risk Assessment

2. Causes (of the risk)	
1	Desatisfaction with regards to the salary package
2	
3	
4	
5	
6	
7	
8	
9	
10	

1. Risk
Remuneration

3. Consequences (of the risk)		
1	Lack of performance	
2		
3		
4		
5		
6		
7		
8		
9		
10		

	4. Existing Controls for the Causes (affecting the likelihood of the risk)	Eff	Control Owner
	Management Review meetings which will including reviewing of salaries. Open communication lines with managing director to enable a discussion of the issues when they arises	P	Managing Director

	5.Likelihood	Matrix	Control Owner
	- 99% probability, or - impact is occurring now, or - could occur within "days to week"	E6	Managing Director

Risk Assessment

2. Causes (of the risk)	
1	Clients do not stick to the timelines outlined for the submission of results, ignore calls and emails and only submit results after closing date.
2	
3	
4	
5	
6	
7	
8	
9	
10	

1. Risk
Lack of feedback

3. Consequences (of the risk)		
1	Internal undue pressure in the sense that insufficient time is reserved to thoroughly assess and compile reports.	
2	Give rise to inaccurate reports compiled as there is not enough time to thouroughly assess the reports	
3	We cannot meet the deadlines, thus KPI's become affected.	
4		
5		
6		
7		
8		
9		
10		

4. Existing Controls for the Causes (affecting the likelihood of the risk)	Eff	Control Owner
Setting communiation reminders to ensure that clients send results on time (be it via phone call or email).	I	Operations Manager

	5. Likelihood	Matrix	Control Owner
	-> 50% probability, or - balance of probability will occur, or - could occur within "weeks to months"	6D	Operations Manager
	,,,		

Likelihood Criteria

Category	Criteria
E	- 99% probability, or - impact is occurring now, or - could occur within "days to week"
D	- > 50% probability, or - balance of probability will occur, or - could occur within "weeks to months"
C	- > 20% probability, or - may occur shortly but a distinct probability it won't, or - could occur within "months to years"
B	- > 5% probability, or - may occur but not anticipated, or - could occur in "years to decades"
A	- < 5% probability - occurrence requires exceptional circumstances - exceptionally unlikely even in the long term future - only occur as a "100 year event"

Grading Matrix

Consequences	A	B	C	D	E
6	III	II	I	I	I
5	III	II	II	I	I
4	IV	III	II	I	I
3	IV	III	II	II	I
2	IV	IV	III	II	II
1	IV	IV	III	III	III

Likelihood

Any significant changes to the initial or existing design, methods, equipment, materials, or processes that may impact the validity of testing, PT schemes, or CRM production shall be identified, reviewed, and authorised prior to implementation (where applicable and/or necessary). A risk-based approach shall be applied to assess potential impacts, and appropriate actions shall be taken to eliminate or minimise such risks. Records of these evaluations and actions shall be retained.

1. General requirements

1.1 Impartiality

ISO 17043:2023 clause 4.1, ISO 17034:2016 clause 4.2 and ISO 17025:2017 clause 4.1 require that the activities in the organisation are undertaken impartially.
The organisation has structured to manage impartiality in developing three documents:

- Risk assessment to impartiality
- Impartiality policy
- Declaration of interest

Risk assessment to impartiality document number ASRI 4.2-001 was developed, utilised to identify the risks associated with activities of running the proficiency testing scheme and reference material production. The process involved identifying risks considering potential (future) events which may negatively impact on individuals, assets, and/or the environment because of those risks, their likelihood and consequences, and actions which can mitigate these effects.

Impartiality policy document no. ASMF 4.2 was developed to formally document and outline the standards and expectations within an organization, providing clear guidance for employee behavior and decision-making. It helps eliminate micromanagement by setting clear directions, improving efficiency, and reducing stress in human resources management. Well-defined policies promote professionalism both internally, fostering a respectful work environment, and externally, enhancing the organization's reputation and business relationships.

Declaration of interest document no. ASMF 4.2.1 was developed to promoting transparency and good governance in the organisation. Again, to ensure that
