## 4. PROCEDURE

The documentation which defines the Proficiency Testing Scheme and Reference Material production Quality Management System is controlled. The company operates a system of document control for procedures and standards which will enable the following activities:

- All documentation is reviewed for adequacy before approval be authorized personnel
- Document amendments shall show evidence of change or modification. Deleted words will be denoted with strikethrough. Changes are highlighted.
- Identification of reasons for changes and revision codes
- Issuing new or amended documents to point of use
- Maintaining legibility of issued documents
- Ensuring controlled status of externally sourced documents
- Identification and record disposition of obsolete documentation
- Periodic document review
- Documents are re-issued after a practical number of changes have been made
- Only approved documentation is used in the Quality Management System

### 4.1 Checking and approval of adequacy

All documents are reviewed for adequacy before approval by Operations Manager.

### 4.2 Identification of changes, reasons and revision codes

Changes to documents are recorded in the record amendment table of the respective procedure. The new revision number, date of revision and reason for change is clearly identified in a table of the respective document.

## 4.3 Issuing new or amended documents to point of use

Operations Manager issues new or revised documents to the point of use. The Master Copy of the previous revision is withdrawn and filed. The Laboratory Manager signs acceptance of the new revision and is responsible for the disposal of all copies of the previous revision.

## 4.4 Maintaining legibility and accuracy of issued documents

The Operations Manager is responsible for reviewing the accuracy of new document and authorizing all documents for legibility and accuracy

## 4.5 Identification, retrieval and disposal of obsolete documents

The Laboratory Manager identifies obsolete documents during routine review or formal review with the Operations Manager every five years or when codes of practice change. The Laboratory Manager ensures the document is withdrawn from the point of use. The Master Document list is updated and the document declared as obsolete and withdrawn. Withdrawn and obsolete documents are held in the Withdrawn/Obsolete Document file and retained for a specific period with a minimum period of 3 years. Computer documents are backed up on the company file server and stored for a minimum period of 5 years

## 4.6 Periodic document review

The Laboratory Manager and Operations Manager conduct a formal review of all documents at least every five years or when codes of practice change. The results of these reviews are documented. Documents are also reviewed during Internal and External Audit.

## 4.7 Documents are re-issued after a practical number of changes have been made

The Operations Manager is responsible for the re-issue of documents.

## 4.8 Only approved documents are used in the Proficiency Testing Scheme and Reference Material production Quality Management System

The Operations Manager is responsible for approval of adequacy of new documents, for updating amendment registers, circulation of amended documents and control of obsolete documents. Regular internal audits shall be carried out to ensure only approved document are being used.

| | *Compiled by:* | **Sifiso Nyambi - Laboratory Manager** |  |
| | *Approved by:* | **Nonhlanhla Msibi - Operations Manager** |  |

## 4.9 A Master List of documents shall be kept to identify status of all documentation

Each document shall be given a unique reference code. The prefix letters of the code refer to a particular kind of document, as shown below:

| | |
|---|---|
| Quality Manual | ASDP |
| Production Procedure | ASMF |
| Technical forms | AS…TF |
| Work Instruction | WI |

These procedures which relate to document control ensure that pertinent issues of appropriate documents are available at all locations where operations that are essential to the effective functioning of the Quality Management System are carried out and to ensure that all obsolete documents are removed from the point of issue or use.
