MANAGEMENT REVIEW MEETING MINUTES

Date: 10 February 2026

Time: 14:00-16:30

Location: Azuresky Office

Attendees

Chair: NP Msibi (Operations Manager)

Scribe: Lilo Photo (Laboratory Technician)

1. Sifiso B Nyambi (Laboratory Manager)
2. Tshepo Maponya (Laboratory Supervisor)
3. Nosipho Hlongwane (Laboratory Technicians)
4. Abenathi Jama (Laboratory Technicians)
5. Keitumetse Maleka (Laboratory Technicians)

1. Purpose of the Meeting

The meeting was held to address the non-conformance (NC) raised by SANAS regarding risks and opportunities.

2. Risk and Opportunity Procedure

It was agreed that Tshepo will draft a procedure on Risks and Opportunities.

The procedure should include:

- How the risks were identified and assessed
- The methods used to identify the risks, including:
    - Brainstorming
    - Operational occurrence
    - Management Review Meeting (MRM)

Ways in Which Risks Were Identified

The following methods of risk identification were discussed:

1. SWOT analysis
2. Brainstorming
3. Flow chart
4. Operational occurrence

3. Updating the Summary of Risks and Opportunities

The summary of risks and opportunities will be updated to reflect the risks identified.

4. Identified Risk: Failure to Adhere to Submission Timelines

One of the identified risks is that clients do not adhere to the timetables outlined for the submission of results within the required timeline.

It was further noted that:

- Upper management was informed of the issue.
- N. Msibi receives non-conformance (NC) for keeping the portal/ for opening and accepting results after the closing date.

Action to Address the Risk

Management has addressed this risk through the creation of an MS form which clearly indicates the opening and closing dates for submission of results.

In addition, it was proposed that the instructions should be updated to inform participants that failure to submit results on time may result in forfeiture of the participation fee for that round.

5. Financial

The financial matter was noted, but no further details were provided in the handwritten notes.

6. Identified Risk: Management Influence

Another identified risk is management influence.

It was discussed that:

- Senior staff may exert pressure on personnel to achieve results within a specific period
- This may be done to please clients or maintain contracts

7. Identified Risk: Dual Roles

Another risk identified is dual roles, where one person performs a test and also approves the results.

8. Identified Risk: Lack of Personnel

A further identified risk is lack of personnel.

9. Methodological Risks

- **Identified Risk:** Potential selection of incorrect methodology for a specific test or parameter.
- **Impact:** Compromised data integrity and inaccurate analytical results.

10. Complaint Management & Conflict of Interest

Query: What is the laboratory's procedure for handling complaints in instances where the personnel involved in the production or testing are also tasked with investigating the complaint?

11. Implementation Status

- **Finding:** There is currently **no implementation** of a corrective action plan or revised procedure to address the conflict of interest mentioned above.

Recommendations for Follow-up

1. **Procedure Revision:** Update the Standard Operating Procedure (SOP) for complaint handling to ensure impartial investigation (e.g., ensuring investigators are independent of the activity being audited/investigated).
2. **Management Oversight:** Require a formal sign-off from the Operations Manager on all high-priority complaints.

Minutes accepted and authorised by:
NP Msibi
