Management Review Meeting Minutes

Date: 22 January 2026
Time: 13:00pm – 17:00pm
Location: AzurESky office

Attendees

- Nonhlanhla Msibi (Chairperson)
- Sifiso Nyambi (Lab Manager)
- Tshepo Maponya (Lab Supervisor)
- Lilo Photo (Lab Analyst)
- Keitumetse Maleka (Lab Analyst)
- Nosipho Hlongwane (Lab Analyst)
- Abenathi Jama (Lab Analyst)

Apologies

- No apologies were recorded in the notes.

Agenda

1. Safety
2. Changes in internal and external issues relevant to PT and RM activities
3. Fulfilment of objectives
4. Suitability of policies and procedures
5. Status of action
6. Outcome of recent internal audits
7. Corrective actions
8. Assessments of external bodies
9. Changes in the volume and type of the work in the range of PT and RM activities
10. Customer, participant and personnel feedback
11. Complaints and appeals
12. Effectiveness of any implemented improvements
13. Adequacy of resources
14. Results of risk identification
15. Outcome of the surveillance of the processes
16. Other relevant factors

Minutes (Key Discussions)

1. Safety

- The issue of the laboratory air conditioner leaking was raised. As an interim measure, the use of a bucket with a lid was suggested. A proper corrective plan to address the A/C leak must be assessed and implemented by **23 January 2026**.
- It was noted that the Lab Analysts' respirator filters need to be replaced when required. It was agreed that:
    - Filters will be replaced **every six months** if masks are used frequently during sample preparation.
    - If six months have elapsed but the masks were **not used frequently**, the condition of the filters will be assessed before replacement.
- The need for **new gloves** for Lab Analysts used during sample preparation was discussed. This must be addressed by **31 January 2026**.
- The requirement for **new PPE for Lab Analysts** was noted. This issue will be reported to **Dawn (Hlogirati)** for follow-up.

2. Changes in internal and external issues that are relevant to the PT and RM activities

- Stability monitoring will be changed from **monthly** to **quarterly** analysis, **excluding CV**. Due to significant data gaps, CV will continue to be analysed **monthly**.
- The need for **new crucibles** for all parameters (**Inherent Moisture, ISO Volatile, and Quick Ash**) was discussed. It was agreed that **10 new crucibles** for each parameter will be purchased by **28 February 2026**.
- The Lab Manager and Supervisor raised concerns regarding the **late submission of results**, which is impacting workload and constitutes a breach of company policy. The matter will be escalated to **upper management (Nonhlanhla Msibi)** for resolution.
- **PT stickers** are to be ordered **in advance** to avoid delays.

3. Fulfilment of Objectives

- The **respirator issue objective** has been fulfilled and closed.
- It was agreed to **increase the KPI score from 2 to 3** for **ISO 17034, ISO 17025, and ISO 17043 accreditation**.
- A reminder was issued to **update the "Stability Monitoring" statement** on the **CRM (Certified Reference Material) certificate**.

4. Suitability of Policies and Procedures

- It was discussed that **suitable HR and Finance policies and procedures** are required and must be **developed and implemented by 31 March 2026**.

5. Status of Action from previous management reviews

- As this was the **first management review of the business**, there were **no previous action items or action statuses** to review.

6. **Outcome of Recent Internal Audits**

- During the internal audit conducted by **Nonhlanhla Msibi**, **two non-conformances (NCs)** were identified. These related to the **verification records for the 4.75 mm** and the **in-house maintenance logbook**.
- In addition to the two NCs, **documentation gaps** were identified. Some of these gaps have already been **addressed and corrected**.

7. **Corrective Actions**

- The laboratory recorded **non-conformances (NCs)** arising from **internal audits, operational observations, and occuranes**. The identified issues have been **addressed**.
- It was agreed that a **register to track opened and closed NCs** will be created and maintained. **Lilo D Photo** volunteered to compile and manage this register.

8. **Assessments of External Bodies**

- Assessments by external bodies, including SANAS, are still pending and have not yet taken place.

9. **Changes in Volume & Type of Work or in the Range of PT/RM Activities**

- It was discussed that Section 9 of the Management Review agenda document requires updating to include “Customized Quality Assurance Programme.”
- The laboratory has expanded its scope to include Washability and HGI analysis.

10. **Customer, participant and personnel feedback**

- Customer feedback forms are to be issued on Monday, 26 January 2026.

11. **Complaints and appeals**

- No matters of significance were discussed under this section.

12. **Effectiveness of any implemented improvements**

- The removal of the batch system and the implementation of the cone and quartering method were discussed.
- The practice of processing one sample at a time was also discussed and noted.
- The replacement of cotton masks with respirators was noted.
- The ISO Moisture analysis time was changed from 1½ hours to 2½ hours, and this change was noted.
- Changes to laboratory workflow were discussed, with analysts now working in pairs and alternating analysis days to help prevent burnout.

13. **Adequacy of Resources**

- This matter is work in progress.

14. **Results of Risk Identification**

- The risk register requires review and updating.

15. Outcome of the surveillance of the processes

- Clarification is required on the definition and application of process surveillance in accordance with the relevant standard.

16. Other relevant factors

- No additional relevant factors were discussed.

Action Items

No.	Action Item	Responsible Person(s)	Due Date	Status
1	Assess and implement a corrective plan to address the laboratory A/C leaking issue	Nonhlanhla Msibi	23 Jan 2026	Open
2	Replace respirator filters every six months when frequently used; assess condition if infrequently used	???	Ongoing	Ongoing
3	Procure new gloves for Lab Analysts for sample preparation	Nonhlanhla Msibi	31 Jan 2026	Open
4	Report and follow up on the need for new PPE for Lab Analysts	Dawn (Hlogirati)	TBD	Open
5	Change stability monitoring frequency to quarterly (excluding CV); continue monthly monitoring for CV	Lab Manager	Immediate	Implemented
6	Purchase 10 new crucibles for Inherent Moisture, ISO Volatile, and Quick Ash analyses	Nonhlanhla Msibi	28 Feb 2026	Open
7	Escalate and resolve the issue of late submission of results affecting workload and policy compliance	Nonhlanhla Msibi	TBD	Open
8	Ensure PT stickers are ordered in advance	Nonhlanhla Msibi, Lab Manager/Supervisor	Ongoing	Ongoing
9	Update the “Stability Monitoring” statement on the CRM certificate	Lab Manager/ Supervisor	TBD	Open
10	Develop and implement HR and Finance policies and procedures	Nonhlanhla Msibi	31 Mar 2026	Open
11	Address internal audit NCs related to the 4.75 mm verification record and in-house maintenance logbook	Lab Analysts	TBD	In Progress
12	Review and close identified documentation gaps	Lab Manager	TBD	In Progress
13	Track number of Non-Conformance (NC) opened/closed and update register	Lilo D Photo	TBD	Open

14	Update the Management Review agenda to include “Customized Quality Assurance Programme”	Lab Manager/Supervisor	TBD	Open
15	Issue customer feedback forms	Nonhlanhla Msibi	26 Jan 2026	Open
16	Review and update the risk register	???	TBD	Open

Next Meeting

The date and time of the next meeting were not specified.
