	INTERNAL AUDITS PROCEDURE
	Document no: ASMF 8.7

Compiled by:	**Sifiso Nyambi - Laboratory Manager**	
Approved by:	**Nonhlanhla Msibi - Operations Manager**	

Introduction

This procedure is developed as a guideline for Azuresky (Pty) Ltd to follow when conducting internal laboratory audits. The objective is to assess for compliance to requirements stipulated as per ISO 17025:2017; ISO 17034:2016; ISO 17043:2023 and other relevant SANAS codes of practice.

Scope

This procedure details the activities performed when conducting internal laboratory audit. The procedure covers the process to be followed by Azuresky (Pty) Ltd management.

Purpose

The purpose of this procedure is to describe the requirements for planning, executing audits, establishing records and reporting results of the audits.

Definitions

Table 1: Definitions

Definition	Description
Audit	Systematic, independent and documented process for obtaining audit objective evidence and evaluating it objectively to determine the extent to which the audit criteria is fulfilled
Audit criteria	Set of policies, procedures or requirements used as a reference against audit evidence.
Audit Evidence	Records, statements of fact or other information which are relevant to the statements to the audit criteria.
Audit Conclusion	Outcome of an audit, after consideration of the audit objectives and all audit findings
Auditee	Person/Organization being audited.
Auditor	Person who conducts the audit.
Audit Programme	Description of the activities and arrangements of an audit.
Common sample	Sample collected for more than one intended use.
Conformity	Fulfilment of a requirement
Horizontal Audit	ISO 17025 Management Requirement Assessment
Major non conformance	A non-conformance that may have potential impact on the Quality Management System and may reduce its ability to assure the controlled Processes and may have potential impact to the credibility of the final analytical results which may pose a high risk to the business.
Minor non conformance	Sporadic lapse in the system caused by not adhering to the standard and procedures at all the times. It may not directly affect the quality of results but when left unattended it can lead to a system failure.
Non-Conformity	Non-fulfilment of a requirement.
Observation	A statement of fact made during and audit and substantiated by objective evidence
Vertical Audit	ISO 17025 Technical Requirement Assessments.

	INTERNAL AUDITS PROCEDURE
	Document no: ASMF 8.7

Compiled by:	**Sifiso Nyambi - Laboratory Manager**	
Approved by:	**Nonhlanhla Msibi - Operations Manager**	

Laboratory Audit Procedure

Azuresky management shall be responsible for scheduling and performing laboratory audits. The overview of the audit procedure is illustrated below. The management team shall:

- Step 1: plan the audit,
- Step 2: communicate planned audit,
- Step 3: Execute the planned audit and record all non-conformities
- Step 4: Address all non-conformities recorded
- Step 5: Close the audit and share the outcomes of the audit with management.

laboratory audit schedule

The schedule of the laboratory audit program shall be developed by Management team and reviewed annually or when risks and opportunities that which required continuous evaluation through audits are identified. The audit program shall be documented and signed off by the Operations Manager before the start of each financial year. The audit program schedule shall be documented and shall be readily available on QMTEKLIMS server.

Planning for the laboratory audit

The Management team shall establish the laboratory audit objectives and scope. Audit objectives should be consistent with and support the management system policy and its objectives.

Audit objectives shall be based on the following considerations:

- Business risks e.g. legal, contractual and other requirements applicable to the Azuresky (Pty) Ltd;
- Results of the previous audits;
- Process, products and project performance;

Audit Scope shall be based on the Technical and Management Requirements.
The audit shall be notified to all personnel **verbally or through production meeting.**

The Management team shall discuss and appoint the Lead Auditor.

- The Lead Auditor shall generate the scope of the audit and any requirements to the Auditee at least 24 hours prior to the day of the audit or unless otherwise there is urgent need to conduct the audit with immediate effect.

CONTROLLED DOC

Conduct laboratory audit

The Lead Auditor shall on the day of the audit perform the following:

- Conduct the opening meeting
- Introduce the audit team
- Conduct the audit as planned
- Issue non-conformances when they arise. (Hardcopy and/or Emailed copy).
- Conduct the closing meeting and share the findings.

Auditors shall on the day of the audit perform the following:

- Conduct the audit as planned
- Record all non-conformances on the SANAS F03-09 document.
- Classify the non-conformances either as major, minor or observation
- Discuss the outcome of the audit with the Auditee.
- Some of the documents that can be used during the audit include but not limited to SANAS F44, F48. F49, F90, F91, F66, F176

NB: Major NC shall be addressed within 7 days; Minor NC shall be addressed within 14 days

Conduct a follow-up and close-out

- The Auditee shall within the specified time frame provide the Lead Auditor with evidence of the corrective action implemented.
- The Lead Auditor and the audit team members shall assess the suitability of the evidence of the corrective action submitted by the auditee.
- In the event that the provided corrective actions/evidence are suitable then, the non-conformances shall be closed.
- In the event that the implemented corrective actions provided are not suitable, appropriate action shall be taken to address the gap.
- Should the assessment indicate that the corrective actions are not effectively implemented, then the non-conformance(s) will remain open.

CONTROLLED DOC

- The Lead Auditor shall conduct the close-out sign-off of the non-conformance, indicating the status of the corrective action (Closed/Rejected).
- The copies of non-conformances shall be retained or stored **either** in hardcopy or softcopy. It is acceptable to store the non-conformances on soft copies or hard copies as long as either the soft copies or the hard copies are easily retrievable during the audits or MRMs.
- The audit results shall be made available at the management review meeting.

Audit records

- All records of the audit evidence shall be readily available either on hardcopy or softcopy.
